CEILINGS & FLOORING

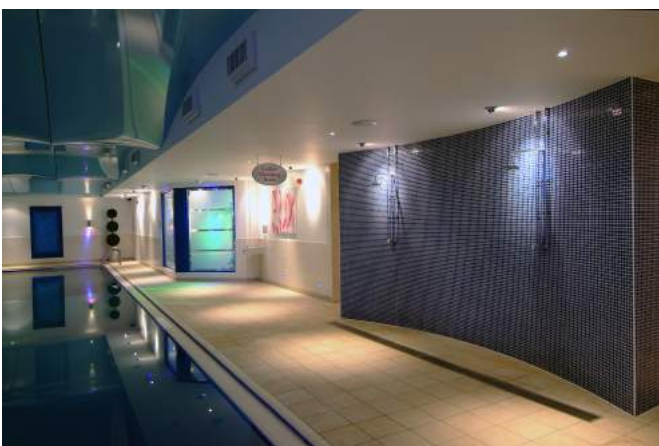

Hurst have been delivering excellence in all types of interior contracting since 1972. Importantly our founding values still remain the same.

- **Project Quality**
- **Timely Project Delivery**
- **Strong Partnerships**
- **Collaboration**
- **Flexibility**
- **Continuous Improvement**

You can rely on the fact that the Hurst approach to each and every project will always be the same whatever it's size and budget.

- A dedicated Hurst Project Team ensures the delivery of each project's specific goals from concept through to completion.
- Hurst always aims to source labour, plant and materials locally whenever possible for each project.
- Site management is constantly monitored with a particular focus on Health and Safety, Security and Site Cleanliness.
- Post Project Reviews ensure that each new project benefits from the learning acquired by it's predecessors.

Hurst can supply and install all types of **Porcelain and Ceramic Tiling** and has extensive experience in the retail, leisure, exhibition and commercial sectors. This includes:

- **Exterior cladding.**
- **Floor and wall tiling.**
- **Reception desks.**
- **Bars.**

Hurst also specialises in natural stone tiles from marble and granite to stone, slate and terrazzo. With the ability to source direct from tiling manufacturers around the world we can deliver the most cost effective solution for a client's particular needs.

Hurst also have particular experience of tiling for both leisure and competition **swimming pools** to meet ASA or FINA accreditation requirements.

Main Contractor: Globe Construction

Sector: Leisure

Merlwood is a group of 55 self-catering holiday cottages and apartments in Grange-Over-Sands set in a beautifully restored Victorian mansion.

Hurst delivered the tiling requirements for the **Merlwood Leisure Centre** which included:

- Tiling of indoor pool.
- Wall tiling.
- Tiling of changing rooms.
- Tiling of toilets and showers.

Main Contractor: ISG Sector: Leisure

Hurst delivered the tiling requirements for the **Pullman Hotel** situated on the newly developed Liverpool Waterfront. The project included floor tiling to the following areas:

- Hotel reception area.
- Communal lift areas.
- Bar and lounge including tiled bar.

Main Contractor: Miller Sector: Leisure

Hurst delivered the Ceramic tiling requirements for main contractor Miller at the **Casa Hotel** in Chesterfield.

This included the install of a unique marble especially quarried and imported from Majorca for the project, the marble was polished on site to a high lustre.

Hurst also installed a range of high quality porcelain tiles throughout the public areas of the hotel.

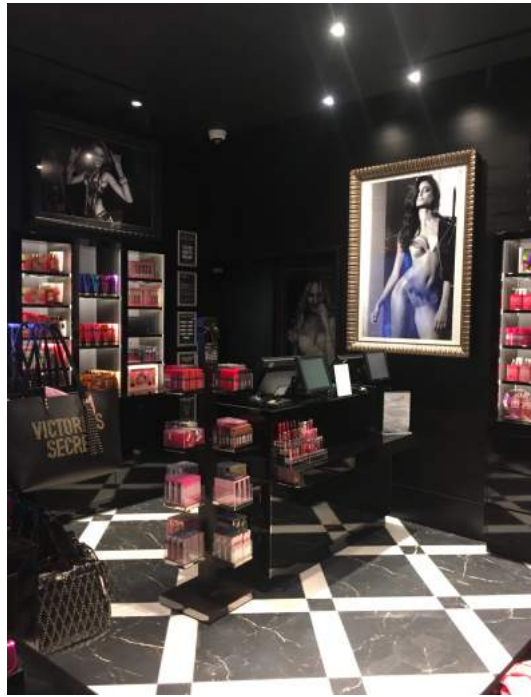

Main Contractor: Hurst Stores & Interiors Ltd.
Sector: Retail

Hurst completed the tiling requirements for a new **World Duty Free Collection** store at London Luton Airport. This involved the laying of new 'Mirrorchip' Gulfstone Quartz ceramic tile flooring to the main store sales floor in two colours. The area covered was 255 m². Hurst also completed the tiling for the World Duty Free stores at Liverpool and Newcastle airports.

Main Contractor: Hurst Stores & Interiors Ltd. Sector: Retail

Hurst completed the tiling requirements for the **Victoria Secrets** store at Luton airport. The distinctive black and white diamond pattern for the sales floor is a striking feature.

Hurst conducts business in a sustainable way to reduce our impact on the environment overall. We are able to deliver projects with timber supplied only from sustainable sources and are fully conversant with the requirements of the current EU timber regulations.

Having invested in a Talbott Biomass Boiler, the Hurst Joinery manufacturing facility can now recycle or reuse timber by-products to produce heat for the factory environment. This in turn reduces the amount of waste that is sent to landfill.

Our Environmental Aims:

- **To ensure compliance with all relevant environmental legislation, regulations and standards.**
- **To ensure all staff understand their impact upon the environment and are aware of their obligations and responsibilities.**
- **The reduction of the use of natural resources.**
- **The reduction and effective management of waste.**
- **The reduction of staff travel whenever possible.**
- **The minimisation of carbon emissions during construction works.**
- **The re-cycling of paper, timber and metals.**
- **To use whole-life costing for projects.**

The success of the **Hurst Occupational Health and Safety Management System** is dependent on it's understanding and acceptance by all employees, this is achieved through the on-going provision of education and training.

Hurst maintains a **Training Record Matrix** for all employees (which can be provided on request) and safety related training is provided by commercial providers e.g. CITB, IPAF & PASMA. All Project Managers, Senior Managers and Directors are required to have attended the IOSH Managing Safely course, Site Managers must hold a SMSTS certificate and Site Operatives are required to hold a current CSCS card. Hurst undertakes an annual review of health and safety training and an annual training programme is produced for all levels of staff.

Further to this Hurst is committed to the professional development of all employees and has an established **Apprentice Scheme** employing a number of apprentices on a full time basis throughout their 3 years at college.

Hurst is committed at all levels throughout the organisation to maintaining and constantly improving high levels of Health and Safety performance. Further details can be found in our **Health and Safety Policy** which is available on request.

The Hurst **Occupational Health and Safety Management System** enables us to pro-actively manage health and safety across all our business operations and ensures that we can deliver the highest health and safety standards on all projects. The system is reviewed annually by our Directors and external Health and Safety Advisor in order to take into consideration new legislation and best practice from other industry sectors.

The Safety Management Procedures which make up the system have been developed and must be complied with by the company management and employees. This includes procedures which ensure Hurst can meet the responsibilities of the CDM Regulations 2015.

It also includes procedures for:

- **Issue and use of PPE.**
- **Incident Reporting.**
- **Risk Assessments.**
- **COSHH Assessment.**
- **Safety Method Statements.**
- **Plant and Equipment.**
- **Manual Handling.**
- **Construction Phase Plans.**
- **Waste Management.**

Hurst works closely with an external **Health and Safety Advisor** whose main responsibilities include:

- Producing a monthly Health and Safety Report.
- Undertaking Accident and Incident Investigations and producing reports.
- Performing regular site inspections and producing reports.
- Giving general advice and support on all Health and Safety issues.
- Keeping Hurst up to date on current legislation and best working methods.
