

Client: National Science and Media Museum

Location: Bradford

Principle Contractor: Hurst Joinery Projects Limited

Hurst are proud to have worked with the National Science and Media Museum in Bradford on its new £1.8m world-class interactive **Wonderlab Gallery**. The gallery explores the science of light, sound and perception through state-of-the-art hands-on activities.

Wonderlab includes more than 20 permanent exhibits including:

- The UK's first permanent Time Twister screen.
- The world's first permanent 3D-printed zoetrope.
- Selfies timed to the exact moment a water drop splashes.
- A 6ft sphere with spectacular recordings of the surface of the sun and earth.
- Sound Bite: listen to music – through your teeth.
- A giant 15m long pink echo tube.
- An 8ft tall mirror maze.
- A musical laser tunnel entrance.
